

Every generation has its great cause.

**mine was a
better life for my family
ours is ending AIDS**

An HIV vaccine is our best hope of ending the AIDS epidemic.

Right now, there is no vaccine to prevent HIV infection. But scientists are working to find one. To succeed, they will need people from all walks of life to support HIV vaccine studies and encourage those who volunteer. Learn more about how you can do your part. Visit <http://betheneration.nih.gov>. Together, we can be the generation that ends the AIDS epidemic. E-mail betheneration@nih.gov for more information.
